

GENERAL PURPOSE & SAFETY REQUIREMENTS

Purpose: Establish standardized procedures to ensure the safe, efficient, and compliant operation of boiler systems. These SOPs are intended to prevent incidents related to high pressure, temperature, mechanical failures, and chemical hazards. Adhering to these protocols protects equipment lifespan, ensures personnel safety, and maintains compliance with OSHA, ASME, NFPA, and local jurisdictional standards.

Applies To:

Steam boilers (firetube and watertube)

Hot water boilers

Condensate return systems

Feedwater systems

Deaerator (DA) tanks

Blowdown systems

Pressure Relief Valves (PRVs), actuators, LWFCOs, and safety devices

Required PPE for Operators:

Safety glasses with side shields

Flame-resistant gloves

Hearing protection

Long-sleeved FR or cotton shirts

Hard hat in high-pressure zones

Non-slip, protective footwear
