

Chemical Feed & Treatment Systems: Compliance, SOP & Optimization Guide

Purpose:

Delivers inhibitors, biocides, and pH control agents to HVAC and process systems to prevent scale, corrosion, and microbial germ

Why It's Ignored:

Chemicals are managed by third parties or monthly service, so day-to-day behavior is not tracked.

Must-Have Docs:

- SDS sheets for all chemicals
- Feed pump calibration logs
- Spill containment inspection
- Daily chemical log sheets

Compliance Officials:

OSHA 1910.1200 (HazCom), EPA Clean Water Act, Local environmental authorities

PPE Required:

Chemical gloves, apron, goggles or face shield, eye wash within 10 sec reach

Installation Practices:

- Secondary containment
- Proper metering pump stroke/volume
- Labeling and tubing identification
- Isolation valves and backflow prevention

Must Checks:

- Chemical drum level and color
- Pump tubing integrity
- Feed rate accuracy
- Spill containment dry and intact

Regulations & Codes:

OSHA, EPA CWA, SDS requirements
