

2. Key Test Points

Parameter	Tool/Method	Ideal Range/Result
Domestic Pressure (cold)	Gauge at main riser	50–80 psi
Hot Water Supply Temp	Thermometer @ outlet	120–140°F
Drainage Flow Rate	Stopwatch & container	≥ 1.5 gpm (sink), ≥ 2 gpm (shower)
Water Heater Recovery Time	Time/temp logging	≤ 30 minutes typical
Backflow Device Status	Inspection & tag reading	Tagged "PASS" annually

3. Emergency Conditions

Event	Immediate Action
Burst pipe	Shut main valve, isolate break, contact repair
Sewer backup	Evacuate, sanitize, use PPE, call plumber
Hot water scald hazard	Shut heater, reduce temp, verify mixing valve
Cross-contamination suspected	Lockout water source, notify health dept
